Notice:

We are looking for a quality checker at the moment

We aim to maintain a proffessional standard in terms of graphics, and overall produce a high quality, sympathetic English version that the original artist would be proud of Quality checking is an integral part of that process

Prior experience is not neccessary, we can work with you through a number of examples and practices to get you up to speed and make sure you know what to look out for The only requirement is that you are a diligent e-mail checker, quality checking is not a time consuming job (it only takes a couple of minutes), but it is imperitive to get it done in good time (ideally within a week) for chapters to get released
